### Dialog solutions help Sri Lanka's Southern Expressway operations

Dialog Enterprise, the corporate solutions arm of Dialog Axiata PLC, has commissioned an integrated communication solution for the Road Development Authority (RDA) to support operations of Sri Lanka's first expressway.

The solution provided by Dialog Enterprise enables real time ticket transactions at all entry and exit points in the highway with secure and faster connectivity being provided using a mobile Access Point Network (APN) solution, branded as Dialog BizConnect. With this solution all Point of Sales (POS) machines are interconnected to the central server system hosted at the Dialog data centre. The state of the art solution provided by Dialog Enterprise would allow officials at RDA to get real time updates on information such as number of vehicles entered, revenue generated from each exit points and the registration numbers of vehicles that have entered or exited the newly opened Southern Expressway, the company said in a statement.

Dialog Enterprise partnered with Access Telecommunications Services (Pvt) Ltd (ATSL) which provided the required application platform and POS machines. Dialog Enterprise said it also provides mobile and data communication facilities for all the operational staff of the Southern Highway due to Dialog's strong geographical coverage throughout the length of the expressway.
